WORK EXPERIENCE

Freelance – Bucharest, Romania

React Developer

[01/01/2023 – Current]

- Crafted responsive websites for small business clients, ensuring compliance with web accessibility standards and improving the end-user experience by 40%.
- Integrated third-party API and services to enhance functionality, streamline data exchange and improve application performance by 35%.
- Achieved 97% customer satisfaction rating by developing interactive and intuitive UX/UI designs.
- Build feature-rich, interactive web applications using React and TypeScript, resulting in a 15% increase in user engagement.
- Enhanced website functionality and improved UX, leading to a 30% increase in conversions.
- Coordinated with the Design team to create smooth animations which improved the website's aesthetics and increased user engagement by 20%.
- Collaborated with other developers in order to introduce a new responsive web application, enhancing customer satisfaction by 25%.
- Reduced the load time and speed up the site visibility in browser by implementing lazy loading and SSR (Server side rendering) which caused in 35% increase audience engagement.
- Developed and tested applications across multiple browsers platforms and devices preventing cross-compatibility issues and improving user satisfaction by 25%.
- Implemented continuous integration/continuous deployment (CI/CD) pipelines for the front-end, slashing deployment times by 50% and increasing deployment frequency.
- Collaborated with QA teams to develop comprehensive test plans, reducing post-release defects by 20% and ensuring high-quality software deliverables.
- Deployed web applications using Vercel, ensuring fast and reliable delivery through modern CI/CD workflows.

Ubisoft SRL – Bucharest, Romania

Quality Assurance Engineer

[01/06/2024 – Current]

- Developed a Playwright and Typescript framework from scratch of over 500 testcases that cut a 2-day manual regression to 4 hours.
- Wired the suite into a Jenkins CI/CD pipeline so tests run on every merge, cutting the pre-release manual pass from 3 days to 6 hours.
- Created and executed Postman API test collections covering 50+ endpoints, reducing repetitive API validation time by 40%.
- Ran manual and exploratory test plans on consumer apps, logging 25+ defects a week during active development.
- Designed reusable Cucumber automation workflows that allowed non-automation testers to execute and maintain automated scenarios with minimal scripting knowledge, reducing dependency on automation engineers by 40%.
- Participated in daily Scrum meetings, providing QA status updates, identifying blockers, and coordinating testing activities with development teams.
- Conducted web and back-office testing across functional, usability, and integration scenarios, identifying 100+ defects and ensuring approximately 95% of critical issues were resolved before release.
- Converted manual test cases into automated scenarios using Selenium and Python, increasing test coverage and execution time by 40%.

Online Requirements/ Networking Specialist

[01/04/2022 – 31/05/2024]

- Led functional, regression and performance testing across multiple apps, improving stability and reducing critical pre-release defects by 35%.
- Mentored junior specialists in understanding Software Requirements Specification (SRS) and proper issue reporting, enhancing bug report quality and reducing invalid reports by 95%.
- Coordinated test passes and risk assessments in line with project timelines, optimizing resource allocation and reducing last-minute delays.
- Actively engaged with developers, compliance specialists and online programmers in weekly meetings, driving smoother SRS implementation and faster feature integration by 40%.
- Maintained organized project documentation using OneNote, Loop and resolved IT support tickets to minimize hardware related disruptions during testing.
- Created standardized test cases using Excel and Google Sheets, improving cross-team cooperation and boosting test execution efficiency by 40%.
- Authored a step-by-step TestRail tutorial for SRS tracking, which was adopted department-wide, streamlining test case management and standardizing QA processes.
- Conducted networking and quality of service tests under extreme conditions (bandwidth, latency, packet loss), identifying critical connectivity issues that led to server optimizations and reduced latency spikes by 25%.
- Orchestrated a complete overhaul of the manual testing framework, which led to a reduction of regression testing time by 40%, saving 50+ hours monthly.
- Designed and executed comprehensive test plans for high-stakes software rollouts, ensuring a 99% success rate on initial product launches.

Online Requirements Specialist

[01/09/2020 – 31/03/2022]

- Designed test plans, test cases and test scenarios based on documentation, reducing costly late-stage fixes and achieving 80% defect detection in early builds.
- Led manual testing on multiple Ubisoft projects, collaborating closely with developers to ensure 95% of reported issues of online areas were resolved before release.
- Collaborated cross-functionality with developers and stakeholders, ensuring a seamless testing process.
- Implemented risk-based testing strategies, accurately prioritizing high-impact test cases, enhancing test coverage by 30%.
- Conducted gray box testing using internal tools on Online Services areas for multiple Ubisoft projects uncovering backend inconsistencies, mitigating critical service disruptions improving system reliability by 45%.
- Acted a liaison between stakeholders, developers and cross-functional teams, ensuring smoother integration of online features and faster resolution of issues by 25%.
- Built advanced dashboards using Jira, tracking issues across multiple projects and delivered weekly test reports based on the Jira dashboards to developers and stakeholders, streamlining prioritization and reducing defect resolution time by 30%.

Senior Game Tester

[01/04/2019 – 31/08/2020]

Tom Clancy's Franchise (Ghost Recon Frontline)

- Improved bug reporting expertise among juniors leading to a reduction in invalid issues and a faster resolution cycle by 25%.
- Coordinated daily testing and multiplayer sessions between two QA teams, increasing the issue detection in multiplayer area by 30%.
- Trained the QA team to create structured test cases based on game design sent by the development team, increasing team autonomy and reducing supervision needs by 50%.
- Led meetings with the development team aligning test execution with development goals, focusing on designing automation test cases reducing the manual testing workload by 30%.
- Created and executed automated tests using Cucumber, managing renderless clients, generating latency reports which lead to a 25% reduction in server response time.
- Established multiplayer test servers using Teabox and Perforce, coordinating cross-team testing sessions integrating renderless clients, reducing multiplayer testing time by 30%.

Game Tester

[01/04/2018 – 31/03/2019]

Tom Clancy's Franchise (Ghost Recon Breakpoint)

- Managed and mentored over 20 juniors, sharing best practices and coordinating testing to improve productivity and issue detection by 30% during the Beta phase of the project.
- Organized and assigned tasks across the QA team, forming specialized PvP and PvE sub-teams across PC, PlayStation and Xbox platforms delivering comprehensive test coverage while reducing overall testing time by 20%.
- Authored a detailed bug reporting guide, reducing invalid bug submissions maintaining high-quality reporting standards across the team.
- Created and documented over 200 structured testcases for the team in Excel, improving test coverage and increasing the number of valid issues identified early by 25%.
- Delivered structured Daily Reports to the Development team, helping prioritize and resolve critical issues 30% faster.
- Mediated and resolved internal team conflicts, fostering a collaborative and proactive environment that improved team morale and overall QA efficiency.

Junior Game Tester

[01/07/2017 – 31/03/2018]

Tom Clancy's Franchise (Ghost Recon Wildlands & Rainbow Six Siege)

- Reported over 300+ bugs using Jira, improving the overall quality and stability of the builds before release.
- Collaborated with developers to debug and resolve critical issues during smoke tests, increasing the build success rate by 40%.
- Wrote over 50 testcases, standardizing workflows for external QC teams to align with Ubisoft testing protocols cutting testing time by 50%.
- Mentored junior members by creating a detailed onboarding documentation reducing the training time for over 10 new testers by 30%.
- Supported projects like Far Cry 5 and Assassin's Creed Origins by assisting in final-stage testing, uncovering and verifying game-breaking bugs ensuring a smooth performance at release.

EDUCATION AND TRAINING

Environmental Technician and Environmental Quality Protection

Technical College Petru Poni Onesti [2009 – 2013]

Chemical Engineer

Politehnica University of Bucharest, Faculty of Applied Chemistry and Materials Science [2013 – 2017]

SKILLS

JIRA, Application Lifecycle Management / Test Rail / Jira Dashboards / Microsoft Excel / Microsoft Word / Microsoft Office / Google Drive / Google Docs / Outlook / Atlassian Confluence / LinkedIn / Microsoft Teams / Harbour Portal / Teabox / Cucumber for Behavior-Driven testing / Manual testing / Online Services / Software testing / API and API Testing / Black Box Testing / Regression Testing / Unit-Testing / Integration testing / System Testing / Acceptance Testing / Agile Methodologies / Security Testing / White Box Testing / Performance Testing / HTML, CSS and SCSS / Javascript, TypeScript / WEB; Web Developer / React JS, React Route, React Hooks, React Dom / Programming in React/ React Native / React Styled Components / Gray Box Testing / Redux / RESTful APIS / Component Lifecycle / Version Control (Git) / Responsive design / Webpack.js / Python (computer programming) / GitHub

Personal skills

Organizational and planning skills / Team-work oriented / Motivated / Good listener and communicator / Critical thinking / Conflict resolution / Decision-making / Reliability / Responsibility / Analytical Thinking / Communication Skills / Time Management / Problem Solving (Problem Analysis) / Adaptability / Creativity / Collaboration / Work Ethic
